ClearFlex Connecting Sleeves

ClearFlex is a simple product that makes a big difference to concrete producers. ClearFlex flexible connectors help solve problems experienced with traditional sleeves, such as premature failure, blockage and interference with cement weigh hopper accuracy. This clever new innovation helps improve plant performance and reduce maintenance costs.

The revolutionary new transparent polyurethane is only 0.8mm thick, yet exceptionally strong and highly flexible. A range of standard diameters from 60mm to 310mm are available in lengths of up to 15 mtr, which can be cut to size and fitted immediately to keep plants running! ClearFlex is available ex-stock at highly competitive prices from sole distributor ConSpare.

Up to 10 times longer life

Transparent for visible flow

Light-weight ideal for weighing

Strong seamless design

Less prone to blockage

ClearFlex offers a number of key advantages. Installation is quick and simple as the user friendly sleeves can easily be stretched over pipe-work for a snug fit and less dust leakage. Exceptional abrasion and tear resistance combined with seamless design ensure long-life cost effective operation. Transparent for visible product flow helps speed up commissioning and simplify troubleshooting. Light-weight, high flexibility makes ClearFlex ideal for weighing applications. Outstanding UV and weather resistance enables use outside and in washdown areas. Smooth wall build up resistance helps prevent blockage and downtime.
