

Hawiflex® EasiFix dampens impact for a quiet life

The Challenge: Transferring heavy concrete block paving to a rumbler was causing severe wear on the transfer chute and creating excessive noise, disturbing local residents. Efforts to solve the problem had proven ineffective until EasiFix linings were installed.

Our Solution: Hawiflex® EasiFix

Key Features: 8mm Hawiflex® polyurethane with integral 8mm foam rubber backing

Improvement: Impact cushioning extends wear life and reduces noise

Benefits:

- Environmental** - dramatic reduction in noise levels
- Efficiency** - 'trampoline' effect keeps blocks moving
- Low Maintenance** - wear life extended significantly
- Productivity** - low noise allows longer working day
- Installation** - adhesive friendly foam ensures excellent bonding
- Competitive** - quick and simple to fit, saving time and money

“Since we installed EasiFix the chute is much quieter and there are no signs of wear after handling a million paving blocks. The foam backing is obviously very effective at cushioning impact. I can’t recommend EasiFix highly enough.” Plant Foreman
