

## Installation time reduced by 80%: Hawiflex® EasiFix Wear Lining

**The Challenge:** Installing polyethylene (PE) wear liners in conical chutes was proving extremely time consuming for a leading materials handling OEM. Rigid PE liners require complicated cutting and forming to suit conical shape. Difficult to achieve minimum gaps and good finish.

**Our Solution:** Hawiflex® EasiFix polyurethane lining with foam rubber backing

**Key Features:** Adhesive friendly foam backing quick and easy to fit  
High flexibility simplifies installation in conical chute

**Improvement:** Installation time reduced by 80%

**Benefits:**

- Efficient** - far lower manufacturing costs
- Lean** - simplified a complex task
- Wear** - lasts up to 5 times longer than PE
- Noise** - foam absorbs impact for less noise
- Flow** - trampoline effect promotes flow
- Safe** - light and safe to handle
- Repairs** - reduce downtime through quick repair

*“EasiFix really is simple to cut, form and fix. Installation took a fraction of the time it used to. The finished product looks and performs better, so it has been a real winner”* Engineering Manager
