

Weighing accuracy dramatically improved: HopperFix Weigh Hopper Breather

The Challenge: A readymixed concrete plant was experiencing problems due to repeated blockage of the cement weigh hopper breather. Loss of venting was causing pressure in the system resulting in poor weighing accuracy, cement losses and slow feed rates. Replacing blocked bags causing high work load for the busy area fitter.

Our Solution: HopperFix Weigh Hopper Breather

Key Features: Reliable, high efficiency venting

Improvement: Weighing accuracy and batch cycle times improved dramatically

Benefits:

- Low cost** - no electrics or pneumatics
- Profitability** - reduce cost per cubic metre
- Quality** - more consistent quality concrete
- Efficiency** - faster batching, higher productivity
- Maintenance** - conducted by batcher, no need to call in fitter
- Waste** - reduction in cement losses

“HopperFix is such a simple product and yet it has made such a dramatic difference to the efficiency of my plant. In terms of payback, it must be the best £50 I’ve ever spent!” Area Operations Supervisor
