

ConSpare

Make it better.

DataSheet Rubber Wear Tiles

ConSpare rubber wear tiles offer an economical yet highly effective solution to abrasion problems in bins, hoppers and chutes. Wear tiles are a well proven, flexible approach to combating the effects of abrasive wear and tear. Tiles can be precisely configured to tackle localised wear patterns and replaced individually as needed.

The latest addition to our range of wear tiles is manufactured from high quality rubber. High pressure moulding imparts maximum abrasion, impact and corrosion resistance to the rubber compound. ConSpare rubber tiles are very competitively priced. They are extremely durable and absorb impact, helping reduce both abrasion and noise levels. These light, easy to handle tiles are perfect for impact zones around the plant.

Low cost wear solution

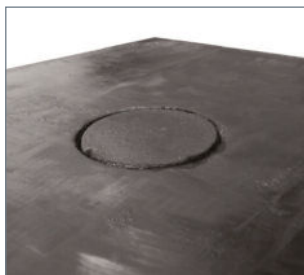

Rubber absorbs impact

Reduce noise

Easy to handle and install

Protective rubber plug for flush surface

Rubber wear tiles are available from stock in 300mm x 300mm x 30mm thick. An integral 5mm thick steel backing plate adds rigidity. Optional 50mm rubber plugs protect bolt heads and provide a uniform contact surface. Other sizes, thicknesses and specifications are available upon request.

Rubber plug

Flexible configuration

Ceramic insert option
