Starclean® Belt Cleaners - Chevron

The Starclean 900 series chevron cleaner provides a good level of cleaning in a traditionally challenging application. This secondary position cleaner is fitted in the 'under belt' position on the return strand just after the head pulley.

The 900 chevron series is a low cost, reliable alternative to other technologies, such as brush cleaners or air knife systems. The single piece blade is manufactured from wear resistant polyurethane which is formed into flexible fingers, cleaning deep into the cleats of the belt for maximum effectiveness.

Cost effective chevron cleaning

Flexible polyurethane blade design

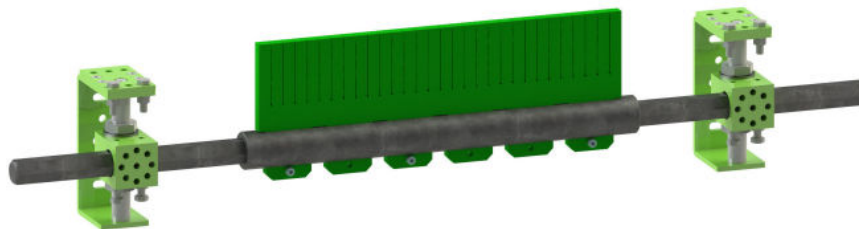

Simple to use tensioning devices

Minimal adjustment required

Quick and simple to install

The modular system is extremely simple to maintain and offers effective cleaning over the long-term. The economical spindle tensioning device is simple to install and requires little maintenance. Starclean can be easily retrofitted onto existing conveyors and requires minimal space.

We also offer a comprehensive range of pre-cleaner, primary and secondary belt cleaners for flat belts which are proven to perform in the toughest of applications. Contact our sales team for further information.

Simple • Effective • Low cost
