

Product quality improved dramatically: Teka Planetary Mixer

The Challenge: A leading independent concrete block producer was experiencing problems with their mixer, leading to extended mixing times, lower productivity and a high reject rate. Retrofitting a new mixer posed many engineering challenges requiring detailed project management.

Our Solution: Teka TPZ 3000 Planetary Mixer

Key Features: Truly counter current high efficiency mixing

Improvement: Product quality and productivity improved dramatically

Benefits:

- Productivity** - shorter mixing time, more blocks per shift
- Strength** - product strength improved
- Finish** - significantly better surface finish
- Project Management** - ConSpare engineers managed the process
- Sustainability** - low power consumption
- Efficiency** - lower cost per metre
- Downtime** - minimal maintenance

"I have been making concrete blocks for 61 years. It's in my blood. We have used many different mixers in that time and I can honestly say that the Teka Planetary Mixer is the best I have ever used." Owner
