Make it better.

DataSheet

Vibration Table Liners

ConSpare's vibration table liners help improve block machine productivity through low maintenance long life performance. Tried and tested across Europe, the liners are site proven to offer cost effective operation. Specialist tungsten carbide facing segments specifically developed for vibration table liner applications offer highest levels of abrasion resistance. The tungsten carbide segments combine extreme abrasion resistance with a particularly low co-efficient of friction to aid pallet flow. This combination ensures long service life, resulting in minimal adjustment requirements and improved end product consistency.

Improve block machine productivity

Low whole life cost

Long life operation

Reduced maintenance

Available in 2 specialist grades

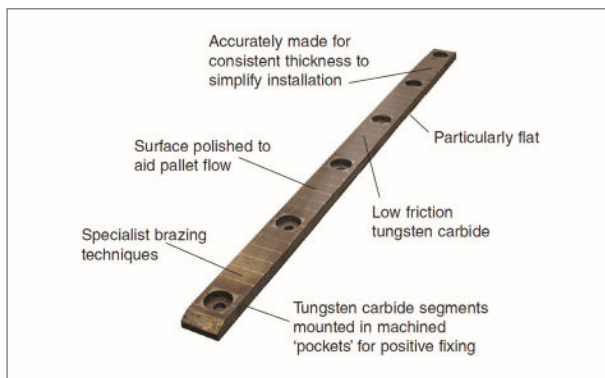

Our tungsten coated vibration table liners are suitable for all types of block machine. Two distinct grades have been developed, offering optimal performance across all board types:

ConSpareUltra -

Widely used with wood and composite boards.
Highly abrasion resistant, equivalent to 90+ Rockwell.

ConSpareUltra **PLUS** -

Specially developed for steel boards.
Abrasion resistant with additional impact resistance.
