

The best mixer washout service scheme in the industry: Walter Washout

The Challenge: A leading concrete producer decided to install a mixer cleaning system at a high profile plant. Management were concerned that other systems had operated successfully initially, but suffered declining performance over time. Walter Washout was chosen as ConSpare offer a full maintenance scheme to help maintain optimum performance.

Our Solution: Walter Approved Service Scheme

Key Features: Experienced engineers with unique tooling and original parts
Low cost maintenance as cleaning heads can be repaired

Improvement: Optimum cleaning performance and reliability maintained

Benefits:

- Safe** - high pressure equipment requires professional inspection
- Trained** - service engineers trained by Walter
- Quality** - only original Walter spares used
- Tooling** - unique Walter tooling essential to carry out service
- Comprehensive** - full inspection, testing and operator refresher training
- No Surprises** - charges agreed before work carried out

“The Walter service scheme is great. We have the system serviced yearly and it is completely hassle free, ConSpare organise everything. The engineers are very knowledgeable and really know how to get the best out of the kit. I have had my system for 5 years, and I think it works better now than it did when it was first installed!” Plant Manager
