

Big leap forward in health and safety: Walter Washout System

The Challenge: A pan mixer in a readymix concrete plant was proving difficult to clean. Manual cleaning was risky and entailed long hours in the pan leading to safety concerns and excessive downtime. Concrete build up causing mix quality issues and high wear rates.

Our Solution: Walter A2B Automatic Washout System

Key Features: Unique, patented rotating cleaning heads

Improvement: Safety improved. Production costs reduced

Benefits:

- Safe** - confined space working prevented
- Mix Quality** - clean mixers mix better
- Productivity** - less downtime, less time wasted cleaning
- Staff** - better working conditions
- Maintenance Spend** - lower wear rates, fewer wear parts
- Reliable** - annual service scheme maintains performance

“The Walter Washout System has been fantastic. It is a lot safer as I no longer have to get into the mixer every day. It really cleans well, even in the hard to reach spots. I can genuinely say I don’t know how I managed before Walter. This is one of the most important pieces of equipment on my plant.” Plant Manager
