# Heavy Duty Level Switch - KA

In our capacity as sole distributor for Monitor Technologies we supply a comprehensive range of level switches offering site proven reliability at highly competitive prices.

The heavy duty KA rotary paddle level switch is particularly robust and designed to offer long life cost effective performance with minimal maintenance requirements. This model is site proven with over 20,000 units supplied annually. The built in signal delay feature helps prevent false activation for reliable operation. An optional output signal can be utilised to indicate shaft rotation for ground level testing.

**Rugged cast aluminium housing**

**Screw cap for easy access**

**Long life sealed bearings**

**Optional probe test output**

**Wide range of voltages**

**ATEX and high temp versions**

Monitor level switches generate an alarm signal once material in storage vessels reaches a predetermined high, low or intermediate level. They are suitable for use in silos, hoppers and bins containing free-flowing granular materials such as cement, cement substitutes, sand and aggregates.

A comprehensive range of interchangeable paddle assemblies is available from stock helping to increase versatility. Extension rods with threaded and pinned connectors for secure fixing are available in a variety of lengths to suit application requirements. For full specification please see Bulletin 213 on our website.
